Suniti Construction CRM - Frontend API Reference

Comprehensive route mapping, payloads, and testing parameters for the frontend development team based on all integrated Express routers.

1. Authentication & System Health (`/api/auth`)

Endpoint	Method	Description	Parameters / Payload / Headers
`/health`	GET	Database Health Check	Public. Verifies Prisma connection status and uptime.
`/api/auth/login`	POST	Employee Authentication	Body: `{ "email": "...", "password": "..." }`. Returns JWT token & employee object.
`/api/auth/me`	GET	Get Logged-In Profile	Header: `Authorization: Bearer <token>`. Returns current employee details.
`/api/auth/register`	POST	Register Staff Member	Header: Admin Token. Body: `{ "name": "...", "email": "...", "password": "...", "role": "SALES_REP" }`.

2. Customer & Tier Management (`/api/customers`)

Endpoint	Method	Description	Parameters & Automation Rules
`/api/customers/new`	POST	Create Customer & Opportunity	Body: Name, phone, project title, location, optional `next_call_date` (triggers 30-day fallback if blank).
`/api/customers/existing`	GET	Grouped Existing Customers	Returns existing customers grouped by: `PREMIUM`, `LOYAL`, `INTERIOR_DESIGNER`.
`/api/customers/blocklisted`	GET	Retrieve Blocklisted Accounts	Manager/Admin access. Returns all blocklisted customers.
`/api/customers/:id/opportunities`	GET	Company Opportunities & Plants	URL Param: `id` (Integer company ID). Returns linked projects.
`/api/admin/customers/:id/blocklist`	PATCH	Toggle Blocklist Status	Body: `{ "is_blocklisted": true/false }`. Manager/Admin only.
`/api/customers/:id/tier`	PATCH	Modify Customer Tier	Body: `{ "tier": "PREMIUM" | "LOYAL" | "INTERIOR_DESIGNER" }`. Strictly **Manager Only**.

3. Opportunity & Pipeline Management (`/api/opportunities`)

Endpoint	Method	Description	Parameters & Lifecycle Rules
`/api/opportunities`	POST	Create New Opportunity	Body: `{ "customer_id": 4, "project_title": "...", "location_name": "...", "lead_temperature": "HOT" }`.
`/api/opportunities`	GET	List All Opportunities	Supports filters by status, phase, employee, and customer.
`/api/opportunities/:id`	GET	Get Opportunity Details	Returns opportunity with customer details and lead note history.
`/api/opportunities/:id/status`	PATCH	Update Status & Phase	Body: `{ "deal_status": "CLOSED_WON", "project_phase": "DEAL_CLOSED", "tier": "LOYAL" }`. Triggers Rule 2 graduation.

4. Task & Lead Notes Module (`/api/tasks` & `/api/lead-notes`)

Endpoint	Method	Description	Parameters & Attribution Rules
`/api/tasks/today`	GET	Today's Task Queue	Returns prioritized pending tasks scheduled for the logged-in employee today.
`/api/tasks/opportunity/:opportunity_id`	POST	Log Call & Schedule Follow-Up	Body: `{ "conclusion_notes": "...", "next_call_date": "..." }`. Self-assigns follow-up or triggers 30-day fallback.
`/api/tasks/:note_id/complete`	PATCH	Mark Task Completed	Body: `{ "is_completed": true }`. Records completion timestamp and `completed_by` attribution.
`/api/tasks/:note_id/assign`	PATCH	Manager Direct Assignment	Manager/Admin access. Assigns task directly to any employee.

5. Manager Controls, Analytics & Employee CRUD (`/api/manager` & `/api/employees`)

Endpoint	Method	Description	Access & Parameters
`/api/manager/workload`	GET	Team Workload Overview	Manager/Admin. Returns active opportunities and pending task counts per sales rep.
`/api/manager/alerts/overdue-tasks`	GET	Overdue Task Alerts	Manager/Admin. Filters pending tasks where `next_call_date` has passed current time.
`/api/manager/audit/lead-history/:id`	GET	Full Lead History Audit	Manager/Admin. Displays creator name, updater name, and full timeline attribution.
`/api/manager/analytics`	GET	Analytics & Export (CSV/JSON)	Manager/Admin. Aggregates pipeline totals, conversion rates, and activity summaries.
`/api/employees`	GET	Staff Directory List	Accessible by all staff. Filterable by role query parameter.
`/api/manager/employees/:id`	DELETE	Delete Employee Account	**Admin Only**. Permanently deletes staff member from the system.
